

R307-210. INCORPORATION BY REFERENCE
Amendments to 40 CFR Part 60 Effective in FY 2006

1. May 18, 2005. 70 FR 28606. Electric Utility Steam Generating Units. Amend Subparts A, B, Da, HHHH, and Appendix B. [NOTE: Subpart HHHH is specifically excluded from this incorporation by reference; see separate filing in this issue for R307-224, where parts of Subpart HHHH are incorporated.]

SUMMARY: In this document, EPA is finalizing the Clean Air Mercury Rule (CAMR) and establishing standards of performance for mercury (Hg) for new and existing coal-fired electric utility steam generating units (Utility Units), as defined in Clean Air Act (CAA) section 111. The amendments to CAA section 111 rules would establish a mechanism by which Hg emissions from new and existing coal-fired Utility Units are capped at specified, nation-wide levels. Allowances are readily transferable among all regulated facilities. The EPA is also taking final action to amend the definition of "designated pollutant." to conform to EPA's interpretation of the provisions of CAA section 111(d)(1)(A), as amended by the CAAA. The final rule is effective on July 18, 2005.

2. September 22, 2005. 70 FR 55568. Amend the definitions in Subpart CCCC, Commercial and Industrial Solid Waste Incinerators. [NOTE: There are no sources in Utah subject to this rule.]

SUMMARY: The EPA has completed its reconsideration of certain regulatory definitions that determine the type of sources subject to EPA's new source performance standards (NSPS) and emission guidelines (EG) for commercial and industrial solid waste incineration (CISWI) units under section 129 of the Clean Air Act (CAA). With this action, EPA is promulgating revised definitions for the terms "solid waste," "commercial or industrial waste," and "commercial and industrial solid waste incineration unit." The final rule is effective September 22, 2005.

3. December 16, 2005. 70 FR 74869. Amendments to Subparts A, EEEE, FFFF, Other Solid Waste Incineration Units.

SUMMARY: EPA is promulgating new source performance standards (NSPS) and emission guidelines for new and existing "other" solid waste incineration units (OSWI). The final rules for OSWI units fulfill the requirements of sections 111 and 129 of the Clean Air Act (CAA), which require EPA to promulgate NSPS and emission guidelines for solid waste incineration units. The final rules address only the incineration of nonhazardous solid wastes. The rules are effective on February 14, 2006 and June 16, 2006.

4. December 16, 2005. 70 FR 74679. Correct Subpart Dc, 40 CFR 60.41c, Electric Generating Units.

SUMMARY: In title 40 of the Code of Federal Regulations, Part 60 (Sec. 60.1 to End), revised as of July 1, 2005, on page 167, in Sec. 60.41c, correct the definition of "Annual capacity factor."

5. February 24, 2006. 71 FR 9453. Amend Subpart GG, Stationary Gas Turbines.

SUMMARY: EPA is taking direct final action to revise certain portions of the standards of performance for stationary gas turbines to clarify that we are not imposing new requirements for turbines constructed after 1977. Owners and operators of existing and new turbines may use monitoring that meets the pre-existing monitoring requirements. In addition, we have described a number of acceptable compliance monitoring options that owners and operators may elect to use for these units. The rule is effective on April 25, 2006.

6. February 27, 2006. 71 FR 9865. Amendments to Subparts Da, Db, and Dc, Electric Utility Steam Generating Units.

SUMMARY: Pursuant to section 111(b)(1)(B) of the Clean Air Act (CAA), EPA has reviewed the emission standards for nitrogen oxides (NOX), sulfur dioxide (SO₂), and particulate matter (PM) contained in the new source performance standards (NSPS) for electric utility steam generating units and industrial-commercial-institutional steam generating units. This action promulgates the amended standards of performance. The rule is effective on February 27, 2006.

7. May 10, 2006. 71 FR 27324. Amend Subpart E, Large Municipal Waste Combustors.
(NOTE: There are no Utah sources subject to this rule. Only the amendments to subpart E were effective before July 1, 2006, and thus are incorporated here.)

SUMMARY: As part of amendments to the air emission standards for existing and new large municipal waste combustor (MWC) units, EPA revised Subpart E, Applicability and designation of affected facility. The amendments to Subpart E became effective May 10, 2006.

8. June 1, 2006. 71 FR 31100. Correction to the monitoring requirements in Subpart A.

SUMMARY: The EPA issued a final rule on August 10, 2000, that revised the monitoring requirements in Performance Specification 1 (PS-1). The final rule contained a minor error in wording. This action corrects this error. This correction is effective June 1, 2006.
